We have moved and improved! Our new offices at Synergy Center enhance the administration of KEDC's economic development activities. Our new space offers a professional first impression to prospective clients. Our new space is also more space. More space for our clients' privacy. More space for employee training. And more space for progress. Our Open House June 11 will showcase our new offices. The event will precede the Synergy Park Property Owners Association meeting.

Periodically KEDC surveys its primary employers to determine what resources will facilitate business development and profitability. In our last survey, one of the most consistently requested forums for discussion was a CEO Roundtable. Some of our goals in forming the Roundtable include helping existing businesses solve problems and identifying opportunities to attract support business. The Roundtable also helps KEDC build community capacity through hearing current employment experience, expansion plans and perception of conducting business in Kilgore. Our next meeting is May 28.
